Dear Sir

Re: Wahgnion Gold Project – 0168 512 Survey Services
Letter of Reference and Attestation

This letter attests the professionalism and collaborative approach of Austral African Survey Group Pty Ltd (AASG) in the performance of Survey Services for the Wahgnion Gold Project in Burkina Faso. The involvement of AASG spanned 22 months from site establishment in November 2017 to completion and commissioning in August 2019 all culminating in a world class mine development for Wahgnion Gold Operations.

AASG's scope of work included:

- Survey equipment recommendations for purchase by Teranga and use by AASG.
- Establishment of survey control points.
- Earthworks – Verifying contractor set out and levels, measuring and verifying contractor progress claims and capturing buried services As-built prior to backfill.
- Concrete – Providing contractor with set-out coordinates, verifying formwork set out and levels, verifying holding down bolt and cast in levels and position prior to pre-pour signoff and monitoring settlement of critical structures.
- Structural – Column verticality checks and overhead crane beam alignment.
- Mechanical – Mill installation checks.
- General – Water level checks on dams and rivers, signing off dig permits, training local surveyors and taking drone photos for the project team for reporting.

AASG was selected from a competitive tender process involving clarification and adjudication rounds. Upon award, the AASG proposal was fully conforming, costs declared and scope clearly understood. Of significance was the pool of experienced people AASG was able to assign to the project, and the ability of that team to form an integral part of the Owners Management Team. At the close of contract works AASG successfully executed their scope incident free and having trained up a national pool of people whom transferred to the Operations team.

The open and collaborative approach by AASG made for a positive relationship and offered solutions to technical and budgetary problems alike. AASG brought with them reliability, skills, efficiency and a can-do approach. It was a pleasure to have the AASG Team as part of the project delivery program. Thank you.

Yours faithfully,

Kirit Chauhan
Project Director
